PFLUEGER MEDALIST FEATURES

Whether trout fishing in the Rogue, Neversink, Beaverkill, or Au Sable Rivers — or tarpon fishing in the Keys, one is bound to see the Pfluger Medalist in action. The reason — it's the best. A lightweight single-action fly reel — with a style and size for every type of fly fishing.

Pflueger patented drag, long wearing and smooth acting, WORKS ONLY WHEN THE LINE IS GOING OUT. There is no drag to overcome when retrieving. Quick Take-Apart makes changing lines or cleaning really easy. Merely press a button, and the spool comes out. Anglers can change to another size line in seconds. Extra spools are available for this purpose.

Adjustable Drag

In reels Nos. 1494-1498 there is a constant drag while line is paying out, accompanied by a light click. Drag tension is adjustable by means of adjusting screw (18) on front edge of reel while fish is being played. Drag operates only while line is going out — in retrieving line, spool is perfectly free, with a very light sounding click. No. 1498 has line shedding guard over brake adjustment screw.

Dual Clicks

The Nos. 1492-1492½ have a click mechanism which serves as a drag. It is comprised of two clicks, one light and one fairly strong. Either or both clicks can be engaged at the same time, affording the desired degree of tension on spool. (To disengage click, remove spool and turn click tongue so that the short point is toward axle. To engage click, reverse this operation.)

Line Guard

Made of stainless steel which is rustproof and wears better than agate or any other stone. It prevents the line from rubbing the side plate, a safeguard against line damage.

No. 1492 13/16″ pillars, 2⅞″ plate. Wt. 4 oz.
No. 1492½ 1″ pillars, 27⁄8″ plate. Wt. 4½ oz.
Smaller size model where less line capacity is required. Like 1494, etc., in appearance except no drag.

No. 1494 13/16″ pillars, 3¼″ plate. Wt. 5¼ oz.
No. 1494½ 1″ pillars, 3¼″ plate. Wt. 6 oz.
No. 1495 13/16″ pillars, 3⅝″ plate. Wt. 6 oz.
No. 1495½ 1″ pillars, 3⅝″ plate. Wt. 6¾ oz.
Aluminum frame — reinforced for strength. Stainless steel line guide that absolutely will not harm the line. Chrome plated pillars and crossplate. Satin black finish. Quiet, two-way click.

No. 1498 1″ pillars, 4″ plate. Wt. 8 oz.
Heavy duty model specially designed for tarpon, salmon, bonefish, etc. Large line capacity. Reinforced spool and back plate, and larger drag for extra braking capacity.

Adjustable Weight

Medalist reels are made as light as possible without sacrificing strength. This new and exclusive feature enables the angler to increase weight of the reel to balance the rod, if desired. Directions: Remove spool release cover (26) by taking out the two screws (1). Be careful not to lose the spring (2) and spool release cam (25). This will disclose an opening through which lead BB shot may be inserted inside the spool until desired weight is obtained. After weighting reel, if spool is not entirely full of shot, wad full with a heavy string or cotton to prevent rattling. Replace cover as before.

GIVE YOUR REEL PROPER CARE

It is essential that any fishing reel be oiled and greased well before being used (especially a new one) and often when fishing. We advise that this reel be oiled completely at lease once a day. Try all screws at intervals to insure that they are firmly in place. When fishing in fresh and salt waters containing corrosive elements, a good practice is to remove all line from the spool, after which clean all parts carefully inside and out and finally wipe with a soft rag and Pflueger Speede Reel Oil before storing reel.

Medalist Extra Spools

Every fly fisherman should have an extra spool for his Medalist reel. Keep an extra line on this spool for easy and quick conversion.

No. 496X Spool for No. 1492 Medalist
No. 493X Spool for No. 1492½ Medalist
No. 497X Spool for No. 1494 Medalist
No. 494X Spool for No. 1494½ Medalist
No. 498X Spool for No. 1495 Medalist
No. 495X Spool for No. 1495½ Medalist
No. 499X Spool for No. 1498 Medalist

Conversion to Left Hand

Any Pflueger Medalist reel, except Model No. 1492 and 1492½, may be changed to a left hand model without the necessity of purchasing extra parts.

To do this:

1. **Loosen brake and remove spool.**
2. **Remove two screws (key no. 23), the ratchet bearing (key no. 12) and the ratchet (key no. 22).**
3. **Turn pawl (key no. 21) 180° so that its high point is toward brake shoe.**
4. **Reassemble ratchet upside down, that is, with the side having eight notches upward.**
5. **Replace bronze bearing and fasten with two screws.**
6. **Remove line guard (key nos. 9 and 11) and pillar (key no. 10) and move line guard to opposite side of reel.**

SAFETY: Major and minor accidents can occur at any time. Observe safe boating and fishing principles for utmost enjoyment of your fishing day.

SERVICE INSTRUCTIONS

In the event parts and service are required for any of your Pflueger products, please use the following guide to obtain faster service for repairs and parts.

Local service centers are available for your Pflueger fishing reel. Please refer to the bottom of this page for the authorized center nearest you. Fast and courteous service will be given by these centers upon receipt of your reel. Minimum charge for parts ordered by the customer is $2.00. **When returning any Pflueger reel to the service center** or factory service center:

(1) PACK THE ITEM CAREFULLY
(2) ADDRESS IT CLEARLY
(3) SHOW RETURN ADDRESS AND ZIP CODE
(4) ENCLOSE LETTER OF EXPLANATION
(5) INSURE THE SHIPMENT FOR YOUR PROTECTION

ALL SHIPMENTS MUST BE SENT PREPAID — **NO COLLECT SHIPMENTS WILL BE ACCEPTED**
